

VISION FOR MEP SOLUTIONS

43B, GOPALBARI, NEAR SBI BRANCH, OFF AJMER ROAD – 302001,
JAIPUR, RAJASTHAN

ABOUT US

Vision for MEP Solutions is a professionally managed Mechanical, Electrical & Fire Protection

(MEP) engineering company specializing in HVAC, VRF/VRV Systems, Ventilation, Fire Fighting, Electrical Services, and complete turnkey MEP solutions. We combine technical expertise with a client-first approach, delivering systems that are efficient, reliable and built to last.

The company is founded by experienced professionals whose core team successfully delivered numerous MEP projects during their tenure with Pure Air Technologies (2020–2026). This experience now continues under the banner of Vision for MEP Solutions, with an unwavering commitment to quality, innovation and customer satisfaction

OUR VISION

- Deliver world-class MEP solutions
- Maintain quality, safety and professionalism
- Provide energy-efficient systems
- Build long-term client relationships
- Continuously adopt modern engineering practices

OUR MISSION

To become one of India's most trusted MEP engineering companies by delivering sustainable, innovative and technically advanced solutions that redefine comfort, safety and efficiency in every space we touch.

VRF SYSTEM

Variable Refrigerant Flow (VRF) is an advanced air-conditioning system that allows multiple indoor units to operate with a single outdoor unit, with independent temperature control for different spaces.

Ideal For:

- Villas & Premium Residences
- Offices & Corporate Spaces
- Hotels & Hospitality
- Showrooms & Commercial Buildings
- Multi-room Projects

Key Benefits:

- Energy efficient
- Individual temperature control
- Flexible installation
- Space saving

NON-VRF SYSTEM

Non-VRF systems are conventional air-conditioning solutions where individual indoor units are connected to their respective outdoor units. They are a simple and economical choice for spaces requiring independent air-conditioning.

Ideal For:

- Homes & Apartments
- Small Offices
- Shops & Showrooms
- Clinics & Small Commercial Spaces
- Individual Rooms

Key Benefits:

- Cost-effective
- Simple installation
- Easy maintenance
- Independent operation

DUCTABLE AIR-CONDITIONING

Ductable AC systems distribute conditioned air through a network of ducts, providing **uniform cooling across larger areas** while keeping the indoor unit concealed above the false ceiling.

Ideal For:

- Banquet Halls
- Restaurants & Cafés
- Large Offices
- Showrooms
- Hospitals & Institutions
- Commercial & Open Areas

Key Benefits:

- Uniform cooling
- Concealed installation
- Clean aesthetics
- Suitable for large spaces

AMC & AFTER-SALES SUPPORT

At **Vision for MEP Solutions**, our commitment does not end with the supply and installation of your HVAC system. We provide **Annual Maintenance Contract (AMC)** services to ensure your system continues to perform efficiently, reliably, and smoothly throughout the year.

Our **well-trained and technically qualified service team** is specially trained to handle HVAC systems and is deployed to the site as per the system requirements.

OUR AMC SERVICES INCLUDE:

- **Regular System Inspection & Preventive Maintenance**
- **Indoor & Outdoor Unit Check-up**
- **Filter Cleaning & Coil Inspection**
- **Electrical & Refrigerant System Checking**
- **Drainage & Airflow Inspection**
- **Performance & Efficiency Monitoring**
- **Fault Identification & Troubleshooting**
- **Timely Service & Maintenance Support**

COMPLETE HVAC SUPPORT

Supply → Installation → Testing & Commissioning → AMC → Service & Maintenance

With our AMC support, clients can minimize unexpected breakdowns, maintain system efficiency, extend equipment life, and enjoy **reliable HVAC performance with hassle-free maintenance**.

Our trained team. Your reliable comfort.

WIDE RANGE OF VRV SYSTEMS

INDOORS

Wall Mounted

4-Way Cassette

VRV/VRF CONTROL SYSTEMS

We believe that even the most advanced technologies should be accessible in their simplest form. Our control system is easy to use & aids in the seamless functionality of our air conditioning solutions. The flexibility of our control systems enables the technology to interact with customers and conserve energy.

CHILLER AIR CONDITIONING SYSTEM

Centralized Cooling. Efficient Performance. Reliable Comfort.

A **chiller system** is a centralized HVAC solution that produces chilled water for cooling **AHUs, FCUs and other air-conditioning equipment**. It is ideal for large buildings and applications requiring high-capacity, centralized cooling.

KEY ADVANTAGES

High Cooling Capacity – Ideal for large-scale applications

Energy Efficient – Optimized operation for varying cooling loads

Centralized Control – Easy monitoring and management

Flexible & Scalable – Suitable for different project sizes

Reliable Operation – Multiple units can provide redundancy

BMS Integration – Enables smart monitoring and energy management

Reduced Outdoor Units – Helps maintain cleaner building façades

WHERE IS IT USED?

Commercial | **Hospitals** | **Hotels** | **Malls**

Institutions | **Industries** | **Data Centers**

CHILLER TYPES

Air-Cooled Chiller

Simple installation • No cooling tower • Lower water consumption

Water-Cooled Chiller

High efficiency • Ideal for large cooling plants • Suitable for continuous operation

OUR SOLUTION

Heat Load Calculation → Chiller Selection → Plant Design → Piping & Pumping → AHU/FCU Integration → Controls & BMS → Testing & Commissioning

Efficient Cooling. Engineered for Performance.

COMMERCIAL REFRIGERATION

Reliable Cooling for Temperature-Sensitive Products

Controlled-temperature storage and preservation systems for food, beverages, pharmaceuticals and other sensitive products — built for continuous, reliable operation.

KEY ADVANTAGES

- Precise temperature control
- Energy-efficient, continuous operation
- Hygienic, organized storage
- Scalable across capacities and temperature ranges
- Advanced monitoring and controls

WHERE IT'S USED

Retail | Restaurants | Hotels | Food Processing

Pharma | Dairy & Beverage | Cold Storage

SOLUTIONS

- **Cold Rooms** – bulk controlled-temperature storage
- **Freezer Rooms** – low-temperature frozen storage
- **Display Refrigeration** – retail cabinets and showcases
- **Walk-In Refrigeration** – commercial kitchen and restaurant space
- **Blast Chillers & Freezers** – rapid cooling and freezing

OUR APPROACH Load Calculation → Equipment Selection → Design → Installation → Piping & Controls → Commissioning

Keeping products fresh. Keeping business running.

FIRE FIGHTING SYSTEM

At **Vision for MEP Solutions**, we provide comprehensive Fire Fighting solutions designed to protect life, property, and business operations. Our systems are engineered, installed, tested, and maintained in compliance with national and international fire safety standards.

We deliver end-to-end fire protection solutions for residential, commercial, industrial, institutional, and large infrastructure projects.

OUR FIRE FIGHTING SERVICES

FIRE HYDRANT SYSTEM
Design, supply, installation, testing & commissioning of Hydrant systems as per IS standards.

AUTOMATIC SPRINKLER SYSTEM
Automatic sprinkler systems for early detection and suppression of fire.

FIRE HOSE REEL SYSTEM
Installation of hose reel systems for quick response and fire control.

FOAM SYSTEM
Effective fire protection for flammable liquid hazards using foam-based systems.

GAS SUPPRESSION SYSTEM
Advanced gas-based systems for protecting sensitive areas like server rooms, panels, and control rooms.

FIRE EXTINGUISHERS
Supply, installation & refilling of all types of fire extinguishers.

FIRE ALARM & DETECTION SYSTEM
Smart fire detection and alarm systems for early warning and safety.

EMERGENCY LIGHT & EXIT SIGNAGE
Installation of emergency lighting and exit signage for safe evacuation.

WHY CHOOSE US?

EXPERT TEAM
Experienced & certified professionals ensuring reliable fire safety solutions.

QUALITY ASSURANCE
We use high-quality products and ensure compliance with all safety standards.

END-TO-END SOLUTIONS
From design to installation, testing, and AMC – we handle everything.

MAINTENANCE SUPPORT
Regular inspection and maintenance to ensure your systems are always ready.

COMPLIANCE & SAFETY
All systems are executed as per NBC, IS, NFPA & other relevant codes.

WHY CHOOSE US

✓ **Complete MEP Solutions**

From HVAC and ventilation to fire-fighting systems, we provide comprehensive MEP solutions under one roof.

✓ **Expert Technical Team**

Our experienced professionals ensure technically sound, efficient and reliable solutions for every project.

✓ **Quality Products & Materials**

We use trusted brands and high-quality materials to ensure long-lasting performance and reliability.

✓ **Customized Solutions**

Every project is different. We design solutions according to your space, requirements, budget and application.

✓ **Timely Project Execution**

We focus on proper planning, coordination and timely completion while maintaining quality standards.

✓ **Cost-Effective Solutions**

We provide efficient and practical solutions that deliver maximum value without compromising on quality.

✓ **End-to-End Support**

From design and estimation to supply, installation and after-sales support, we manage the complete process.

✓ **Customer Satisfaction**

Our priority is building long-term relationships through transparency, professional service and dependable support.

VISION

FOR MEP SOLUTION

VRF / HVAC | VENTILATION | ELECTRICAL | FIRE PROTECTION

COMFORT. SAFETY. EFFICIENCY.
